throughout the past 30 years there have been significant developments in theory and research relating family variables to various psychopathologies the potential importance of such efforts is obviously great given the implications that reliable and valid findings would hold for treatment and preventive interventions across a variety of settings and populations the purpose of this volume is to present a critical evaluation of this field of inquiry through a detailed assessment of the theoretical perspectives the methodological issues and the substantive findings that have characterized family studies of psychopathology during the past several decades the book is divided into four parts each containing contributions from leading researchers and theorists in the field the first part background presents a review of the major streams of influence that have shaped the development and the present character of the field the second part conceptual foundations contains presentations of general models and orientations relevant to family studies of psychopathology in most cases a particular theoretical perspective provides the primary underpinning of the approach the exception to this format being the family model of

david reiss based on the concept of the family paradigm the major objective of this part is to present a broad yet detailed set of chapters that address the conceptual status of the field it is hoped that this material will provide a rich background against which subsequent discussions of specific theories methods and findings can be more fully appreciated

this guidebook pulls together for the first time the best thinking in the field today about different approaches for working with these families it is written by and for mental health professionals who work directly with alienated children targeted parents and families affected by parental alienation

family therapy as an alternative to medication critically and passionately explores the concepts and practices that constitute the interface between family systems based psychotherapy and modern biological psychiatry this diverse collection of essays eight by psychiatrists is neither for nor against medication but takes a skeptical view of the unquestioned dominance that medication based treatments have achieved among mental health practitioners its viewpoint is that therapeutic attention to context and relationships regularly diminished when medications are prescribed interferes with the development of psychiatric disorders adds to maturity and expands consciousness clinical examples by both practitioners and patients are used to define potential problems that arise from trying to combine a medical model with family systems work and also illustrate the decision making processes and methods for applying family systems based therapies this book will stimulate thoughtful conversation among students and practitioners of all mental health disciplines
